

WEEKLY PROGRESS REPORT

Name: Gauri

Domain: Python Development / AI Internship

Date of Submission: _____

Week Ending: Week-01

I. OVERVIEW

During the first week of my internship, I familiarized myself with the internship process, project objectives, and Python development environment. I installed the required software, explored the project structure, and practiced Python fundamentals to build a strong foundation.

II. ACHIEVEMENTS

- Understood internship guidelines and reporting process.
- Installed Python and required tools successfully.
- Learned Python basics: variables, data types, operators, loops, functions, lists, tuples, and dictionaries.
- Created and executed basic Python programs.
- Improved logical thinking through coding practice.

III. CHALLENGES FACED

- Faced initial difficulty understanding programming logic.
- Resolved syntax and runtime errors through debugging.
- Used documentation and tutorials to overcome learning challenges.

IV. LEARNING RESOURCES

- Python Official Documentation
- Online tutorials and coding platforms
- Internship notes and practice exercises

V. NEXT WEEK'S GOALS

- Learn Object-Oriented Programming (OOP).
- Work on real project tasks.
- Improve debugging and problem-solving skills.
- Write clean and efficient Python code.

VI. ADDITIONAL COMMENTS

The first week was highly productive and helped me gain confidence in Python programming. I am motivated to continue learning, complete assigned tasks on time, and contribute effectively to the project.
